

APPLICATION

The Blocfor 6 ESD is a self-retracting fall arrest device designed to offer **maximum protection** while ensuring **unparalleled comfort of use**. It is equipped with the exclusive ESD (End System Dissipator) system. This ESD system ensures that the operator experiences a force of less than 600 daN even if they fall when the strap is completely unwound. It offers optimal comfort and significantly reduces the impact on the user's body in the event of a fall.

The **Blocfor 6 ESD** has a built-in swivel that prevents twisting and ensures smooth, effortless strap retraction. Its visual fall indicator allows you to check at a glance whether the device has been dropped, providing simple and reliable control of its integrity.

Thanks to its low weight and compact size, it is easy to carry without ever hindering the operator's movements. Its optimised ergonomics ensure intuitive and comfortable handling, even during prolonged use.

Versatile and reliable, it is suitable for the most demanding tasks:

- **Maintenance work at height:** scaffolding, roofs, and terraces.
- **Safe horizontal use:** even on sharp edges with a radius of 0.5 mm or more.

50 kg to 150 kg
use

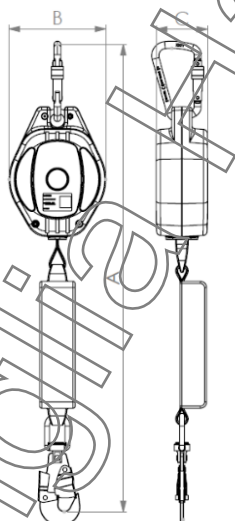

Horizontal use &
EDGE compliant

TECHNICAL CHARACTERISTICS

- Dimensions:
 - o Height (A): 760 mm
 - o Width (B): 136 mm
 - o Thickness (C): 73 mm
- Total length of strap when fully extended: 6 m
- 25 mm wide polyethylene strap
- Polyester energy dissipator integrated into a kit for greater durability
- ABS-filled polyamide plastic casings, UV-resistant and highly resistant to impact and aging.
- Device equipped with an M47 connector at the end of the dissipator and an M24 connector.
- Weight: 2.42 kg
- Minimum working load: 50 kg
- Maximum working load (operator and equipment): 150 kg

M24 Connector

Frequent connexion
Double safety lock
Bichromated steel
Opening ø 19 mm
