**VACULIFT**

Vacuum Transport Systems

## U02-4Q S

Horizontal lifting of up to  
300 kg with 4 suction pads.

**PERFORMANCE. NOTHING ELSE.**

## U02-4Q S

### lifting capacity / horizontal lifting

### suction pad layout

### load dimensions | material thickness (steel)

### dead weight

78 kg

### minimum load weight

10 kg

### length x width x switching height

1.600 x 900 x 930 mm

The absolute classics among the VacuLifters - with a load capacity of up to 4,000 kg, completely based on the mechanical laws of physics: flexible and mobile, without any additional energy source.

The U02-4Q S has a load capacity of 300 kg. The minimum load dimension is 260 x 600 mm. The two lower beams can be rotated by 90° so that they can be arranged in a single row for narrow load strips and crosswise for wide loads.

The energy-independent and mechanical systems for the horizontal transport of smooth and airtight materials are ready for immediate use. Whether indoors or outdoors, our self-suction vacuum lifters can be optimally tailored to your requirements.

They are primarily characterised by their ease of use. For example, the crane control or the automatic switching of the vacuum when putting on and taking off guarantee smooth transport. The sensitive surfaces are protected by the suction pads and sealing rings made of high-quality rubber.

Equipped with an optical-acoustic warning unit, the self-sufficient VacuLifter® offer even greater safety in use.

### Standards of all Green Line VacuLifter®

Energy-independent

- Standard and individual solutions
- 30 year guarantee on spare parts availability
- Made in Germany

The VacuLifter® U02-4Q S is available with a wide range of optional extensions such as an interchangeable set, a transport trolley, water separator, Ergo-Flex handle, a forklift traverse or with foldable parking supports available.
