**VACULIFT**

Vacuum Transport Systems

## U250-4Q

Horizontal lifting of up to  
2,300 kg with 4 suction pads.

Compact. Accurate.  
No compromises.

**PERFORMANCE. NOTHING ELSE.**

# U250-4Q

lifting capacity / horizontal lifting

suction pad layout

load dimensions | material thickness (steel)

dead weight  
460 kg

minimum load  
70 kg

length x width x switching height  
1.000 x 1.000 x 1.540 mm

The absolute classics among the VacuLifters - with a load capacity of up to 4,000 kg, completely based on the mechanical laws of physics: flexible and mobile, without any additional energy source.

The U250-4Q only needs a surface area of 1,000 x 1,000 mm to lift a load of 2.3 tonnes.

The U250 series is the ultimate solution for energy independent lifting of goods weighing up to 2.3 tonnes - with the same ease and intuitive operation as the small U01 series. The U250 is used where there are no more compromises - neither in terms of load nor stress. The U250 series can also be perfectly customised to meet individual requirements - both inside and outside.

Like all Green Line models, this high-performance series is characterised by maximum sensitivity in handling the goods to be transported. The automatic switching of the vacuum during loading and unloading ensures smooth transport. To prevent scratches on sensitive surfaces, even with the heaviest loads, we use optimised suction cups and base sealing rings made of oil-resistant rubber.

Equipped with an optical-acoustic warning unit, the energy independent VacuLifter® offer even greater safety in use.

## Standards of all Green Line VacuLifter®

Energy-independent

- Standard and individual solutions
- 30 year guarantee on spare parts availability
- Made in Germany
