**VACULIFT**

Vacuum Transport Systems

## U400-10Q

Horizontal lifting of up to  
4,000 kg with 10 suction pads.

Versatile. For a wide range of  
load dimensions. No need to  
compromise.

**PERFORMANCE. NOTHING ELSE.**

# U400-10Q

## lifting capacity / horizontal lifting

## suction pad layout

## load dimensions | material thickness (steel)

## dead weight

1.046 kg

## minimum load weight

100 kg

## length x width x switching height

4,800 x 1,650 x 1,990 mm

The absolute classics among the VacuLifters - with a load capacity of up to 4,000 kg, completely based on the mechanical laws of physics: flexible and mobile, without any additional energy source.

As the size of the loads can vary during operation, the U400-10Q is equipped with infinitely adjustable and lockable cross beams and suction pads. For even more variability in use, the outer suction pad pairs can be switched off manually via an easy-to-operate manual valve.

The **U400-10Q** is one of the most popular VacuLifter® and can be used for small and large plates from a thickness of 2 mm (reference: steel sheet).

They are primarily characterised by their ease of use. For example, the crane control or the automatic switching of the vacuum when putting on and taking off guarantee smooth transport. The sensitive surfaces are protected by the suction pads and sealing rings made of high-quality rubber.

Equipped with an optical-acoustic warning unit, the self-suction VacuLifter® offer even greater safety in use.

## Standards of all Green Line VacuLifter®

Energy-independent

- Standard and individual solutions
- 30 year guarantee on spare parts availability
- Made in Germany

The VacuLifter® U400-10Q is available with a wide range of optional extensions such as a transport trolley, water separator, a forklift traverse or with foldable parking supports available.
