

Special Hoists

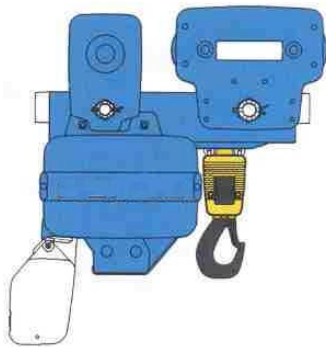

We offer a range of additional features and hoists to suit special applications.

Special Features

- Thoraxal paint for acid resistance
- Stainless steel load chain
- Foundry duty load chain
- Heat shields

Special Hoists

Low Headroom Hoists

The hoist load hook is situated to one side of the hoist to offer an increased height of lift.

Manulift Hoists

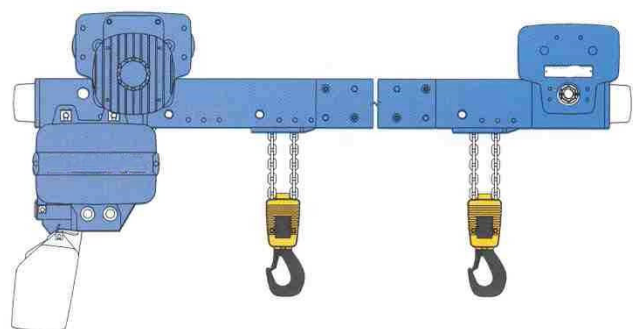

The lifting push button controls are an integral part of the hook block.

Balancers

The hoist balances the load allowing the operator greater control for lifting, guidance and positioning.

Twin Lift Hoists

The hoist is fitted with two load chains lifting and lowering simultaneously to ensure the load is stable and lifted horizontally.
