

## Safety Harnesses

Manufactured in accordance with EN361.

We provide a comprehensive range of safety harnesses, lanyards and accessories to keep you safe when working at a height and in confined spaces.

All our safety harnesses have been manufactured using the latest advances in web technology. Through an innovative series of treatments during production, the webbing is resistant to water, oil and grease, making cleaning and maintenance as easy as possible.

All harnesses have built-in Fall Indicators and feature Easy Fit buckles.

Rear D Harness

Ideal for applications where repetitive movement such as roof maintenance is required

Front / Rear D Harness

Ideal for scaffolding and lift maintenance where frequent movement between front and rear D rings is essential

Side / Rear D Harness

Ideal for leaning applications where hands free operation is necessary.

Side / Front / Rear D Harness

A multi purpose harness ideal for everyday use in a wide range of applications

Rescue Harness

Ideal for confined space access and egress. Allows full mobility whilst ensuring that it can be fitted to a casualty easily

Rescue Harness Jacket

A high visibility jacket allows easier donning of the harness with the advantage of visibility and clothing protection

**Please refer to our accessory page for fixed and retractable Lanyards, Karabiners, Lifelines, and Fall Arrest Blocks etc.**
