

Blocfor™ 5 & 6 ESD Webbing Fall Arrester

NEW for 2013

Introducing the blocfor 5 & 6 ESD
The new generation of retractable fall arresters

Advantages

Easy to install:

- Tested for use in a number of different scenarios

Easy to use:

- For vertical use and 20 degrees from vertical
- Can be used in a horizontal position on a flat roof without a lanyard between the webbing strap end and the harness.
- Can be used on a lifeline system

Service Free:

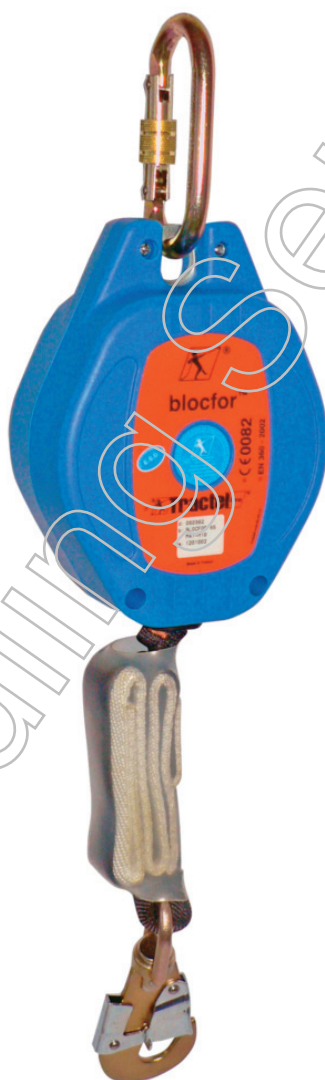

- No need to return to Tractel for an annual service although an annual inspection by a competent person is still required.
- Enhanced safety with ESD

What is ESD?

- ESD (Energy System Dissipater) ensures absorption of a fall even when the webbing is fully unwound
- The system will not accidentally engage but automatically locks within a 60cm range if the user falls
- Swivel connector eliminates risk of twisting
Compliant with EN 360 with option for terrace roof utilisation
- Webbing strap end equipped with a fall indicator
- Castings made of fiberglass-polymide blend ensuring high resistance to shocks and abrasion

Specification

- 25mm width webbing strap
- 5m webbing strap- blocfor 5
- 6m webbing strap- blocfor 6
- Fall indicator
- 2kg weight- blocfor 5
- 2.1kg weight- blocfor 6
- PA/ABS casing
- Anti-spark mechanism
- ESD absorption
- Certified to EN Standard 360 2002
- Height 181mm
- Width 136mm
- Thickness of unit 68mm

Ref	Code
Blocfor 5 ESD	60402
Blocfor 6 ESD	60392
