## ARTICULATED JIB CRANES

Post Mounted

Column Mounted

A clever jib crane arm design offering a cost effective solution to awkward lifting applications and where headroom is limited. The articulated arm can reach behind the post, into the corner of a room, around an obstacle or corner where a fixed length arm will not work.

Available with 2 mounting options:

1. Post Mounted 360° Slew – supplied with its own post and base plate
2. Column Mounted 360° Slew – fixed to a suitable building column

The jib arm sections can be split to suit the application but are normally split 50:50.

Safe Working Load (kg)	Arm Radius (m)
