HAND MAGNETS

HAND MANIPULATION MAGNETS

Hand magnets are designed for manual handling of sheets, blocks and other ferrous materials. Types MC2 and MC-2S are suitable for handling individual sheets from the bundle.

When handling the material never exceed the capacity specified in the table potholders spreadsheet. It can be transmitted loads apostasy.

Glove is used exclusively for manual handling, any suspension (on the crane hook, the design, the bar, etc.) is prohibited and may result damage to potholders or injury to the operator. Always use protective equipment when handling with magnetics potholders.

If you have any further questions regarding the use of magnetics potholders WALMAG MAGNETICS, please contact your supplier or directly to one of the branches WALMAG MAGNETICS.

CC-300 lifter is designed as crane clamp so it can be used on cranes.
