

## VacuEasylift Vacuum Lifting Hoists

The VacuEasylift is a manually operated powered vacuum lifting device that handles almost any type of load. The extremely smooth and quick operation is accomplished by using the same handle to lift, lower and release the load and by using the same vacuum to hold and lift the load. By supplying the VacuEasylift with a vast variety of suction feet it can be used to lift anything from a cardboard box to a television.

### Typical Applications

- Boxes
- Reels
- Wood
- Steel
- Windows
- Sacks
- Cheese
- Paper
- Pallets
- Televisions
- Plastic
- Stone
