

Safety Harnesses

We provide a comprehensive range of safety harnesses, lanyards and accessories to keep you safe when working at a height and in confined spaces.

Our safety harnesses are manufactured in accordance with EN361. Please note that the capacity of our standard range has been increased from 100 to 150 kg to comply to CNB/P/11.062 and CNB/P/11.060.

This fall arrest PPE is tested to stop the fall of a weight of 150 kg (weight of person with their equipment) with a lower impact 600daN – tested to ALL European standards.

If a fall arrest device only meets EN360, EN353-2 or EN355 without any additional specifications, it can only be used for weights up to 100 kg.
