Lanyards - Fall Arrest and Fall Restraint - EN354 EN355

			<p>We offer fall arrest and fall restraint lanyards to form a connection between the operator's harness and an anchor point.</p> <p>Our fall arrest lanyards have a built-shock absorber to reduce the impact forces during a fall.</p> <p>A single leg lanyard is ideal for general use. A twin lanyard is used when the operator has to move between anchor points whilst still maintaining security.</p>
